KEVIN WILDE   FRONT-END WEB DEVELOPER

PROFILE

With over six years commercial experience in Front-End Web Development, I have extensive knowledge of implementing full website builds, responsive sites and web apps. My solid problem solving skills and a keen eye for detail allow me to deliver projects quickly, efficiently and to a high standard.

EXPERIENCE

Senior Freelance Developer, Essence Digital　*October 2013 to December 2013*

Built the Christmas campaign for eBay.eu, a pinterest style board maker, using backbone.js.

Senior Freelance Developer, Hogarth Worldwide　*August 2013*

Helped maintain and build Santander pages.

Senior Freelance Developer, Leagas Delaney　*March 2013 to July 2013*

Helped manage and build the new Leagas Delaney responsive site. Multi region and multilingual, with unique styling and CMS per location. Built an interactive experience for the fall collection for Timberland.

Senior Freelance Developer, Bandstand　*December 2012 to February 2013*

Worked on multiple small sites for high quality building refurbishments as an extension to the printed brochures.

Senior Freelance Developer, Precedent　*Novermber 2012 to December 2012*

Managed and built The University of York 50th Anniversary site and GSM London site.

Senior Freelance Developer, Spark44　*October 2012*

Built an interactive iPad ad for the Jaguar XF Sportbrake ad campaign.

Senior Freelance Developer, Bandstand　*September 2012*

Built the interactive 'Experience' for 123victoriast.com.

Senior Freelance Developer, Hugo & Cat　*May 2012 to August 2012*

Prototyping for the new M&G global site. Built the new Hugo & Cat website, using responsive design. Also worked on a project using the backbone.js framework.

Senior Interactive Developer, SapientNitro　*September 2011 to May 2012*

Working for clients like Vodafone, Unilever and M&S.
